

How to Use ABB Three-Way Calling

Three-Way Calling

Three-Way Calling lets you talk to others at two local or long distance places at the same time. Great for home or business.

To Use Three-Way Calling:

1. Establish your first call. Someone can call you or you can call them.
2. Depress the switchhook for 1/2 second. Listen for three tones followed by a dial tone.
3. Enter the third person's telephone number.
4. When the third person answers, depress the switchhook again for 1/2 second to complete the three way call. If for any reason you do not get an answer, depress the switchhook twice, to return to your first call
