## Connecting Your VDSL Modem

### What's In the Box/ Included:

- Modem & Power cord
- Ethernet cable (yellow)
- Phone cord (gray)
- DSL Filter

### Instructions:

**1**

**Press Power** Button to the "OFF" position. (button will eject out)

**2**

**Connect** the black power cord into the power port on the back of the modem and the other end into a surge protector that is plugged into an electrical outlet.

**3**

**Connect** one end of the gray phone cord to the gray phone port on the back of the modem and the other end to the DSL port of the DSL filter. Plug the DSL filter into a "live" phone jack.

**4**

**Connect** the yellow ethernet cable to the yellow ethernet port on the back of your modem and the internet port on the back of your router.

**5**

### Power On the Modem - Pause.

- The power light will stay solid (green) and the DSL light will flash until a link is made.
- The Ethernet light(s) will flash on your router confirming network activity.
- The DSL light will remain solid when it has a connection to the internet.

Power Ethernet DSL Internet

\* It is not recommended to connect directly to a PC or laptop other than for troubleshooting.
